

Finish it up:

1. For A and B above, draw a picture to show what each brownie pan looked like before Mr. Batdorff and Aunt Sally bought part of what remained.

Model of a brownie pan:

2. Now draw a picture that shows how much each pan the customer got and how much was left. Mark your drawings so that someone else can easily see what fraction of the pan each customer bought.

Mr. Batdorff's:

Aunt Sally's:

3. Use the drawings to check your computations in A and B for the fraction of the brownie pan and the price each customer paid.

We will discuss your findings as a group Be prepared to share!
